# Become a Bibblix user

1. Get a library card

A library card is free and you get it at the library. When you have a library card, you can read 5 books a week in Bibblix.
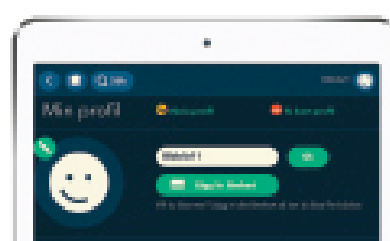

2. Download Bibblix

Bibblix is free to download and use. It is available for download in the App Store and Google Play. Bibblix works on both tablets and mobile phones.

3. Create a profile in Bibblix

Open Bibblix and click the profile picture at the top right corner. Now you can enter a name in the profile.

Click the green button to link your library card to the profile

Enter the number you will find on the back side of your library card and the four-digit PIN code that you have for your card. Then click the green button.
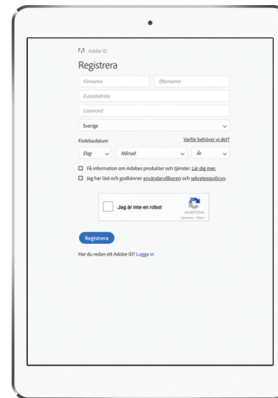

4. Download PocketBook Reader

Unfortunately we cannot show all our books in Bibblix and some must be read in the PocketBook Reader app instead. PocketBook Reader is free.

5. Get an Adobe ID

The books are copy protected. To be able to read them you need an Adobe ID that unlocks the book. Go to www.adobe.com and choose "Log in" and then "Get an Adobe ID".

A parent or other adult must help you with this since you have to be 13 years.

6. Authorise

Open PocketBook Reader and enter your Adobe ID. Now you can go back to Bibblix and start reading books.
